WE ARE WiN

Groups of Expertise Key Expected Results

Raise the visibility of WiN Global's Groups of Expertise, maintain their technical integrity, promote the sharing of technical knowledge across the WiN Global network and beyond, provide expert support when needed, and strengthen recognition of WiN Global as a trusted source of nuclear expertise.

Objectives

1.
Create and maintain a pool of female technical experts, ensuring their expertise can be effectively drawn upon whenever needed.

2.
Organize regular events (such as webinars and workshops) for all members to broaden their understanding of nuclear technologies and support diverse career paths.

3.
Transfer the knowledge available within WiN Global to the next generation of nuclear professionals.

Technical & Groups of Expertise Lead

What inspires you to be part of WiN Global?

I have been a member of WiN Global for more than 20 years. What inspires me most are the friendships I have built with women from around the world and the opportunity to contribute to the continued success of this unique organization.

Professional Profile

Expertise area: Nuclear Non-proliferation, Safeguards and Export Controls, and Disarmament.

Eva is a high-performing and agile nuclear professional with extensive experience in the nuclear field, at the international and national level, with a focus on nuclear on-proliferation, safeguards, export controls, regulatory affairs, and newbuild.
